

# SWARM Lighting Stage Plot for Smaller venues

## Lights:

- One center spot from above. Wider over drum area
- One center front tight spot on longstring
- Various colour spots & floods from above filling the stage sides and back
- Any other gobos, shins & specials are welcome but are not required
- All lights should point down on the stage and away from the video screen  
Back cyc or scrim is used for video projection.  
If there is no suitable screen we can bring one

## Electrical:

- Two electrical outlets at stage back and side
